

CLOUDFLARE®
CONNECTIVITY CLOUD

The Problem: CIOs are responsible for controlling IT environments, but work from anywhere policies, growing cyber threats, network reliability issues, cloud lock in and a whole host of other issues, have made that an impossible task.

The Category: The **Connectivity Cloud** sits between external IT chaos and your organization, once again giving CIOs control of their environments.

Cloudflare is officially a teenager. We launched on September 27, 2010. Today we celebrate our thirteenth birthday. As is our tradition, we use the week of our birthday to launch products that we think of as our gift back to the Internet. More on some of the incredible announcements in a second, but we wanted to start by talking about something more fundamental: our identity.

Take control of your digital everything.

“Yesterday, the day before our 13th birthday, we announced to the world finally what we are: A Connectivity Cloud.”

- Matthew Prince
CEO, CLOUDFLARE
